

TEMPLATE

Precision and accuracy are the benchmarks of IVEK's liquid dispensing systems. Because these elements are vital to your packaging machinery's success, IVEK has developed a comprehensive Validation Guidelines Template providing a smooth transition from set-up, to testing, to production. We offer a multi-page template allowing you to document and test our systems before putting them into production. At a reasonable cost, this template will enable you to perform Installation Qualification/Operational Qualification (IQ/OQ) and Performance Qualification (PQ) tests for good manufacturing practices.

FEATURES AND BENEFITS

- accurately documents and tests the system prior to production
- performs IQ/OQ and PQ requirements
- is an easy-to-follow step-by-step worksheet giving you the simple mapping you need to fulfill your validation requirements
- saves you and your company valuable time as you do not need to develop your own testing template
- is available in two easy formats, disc or hard copy - your choice for easy record keeping
- identifies and tests all functions of the system as defined within the requirements in the validation guidelines template

PRECISION ENGINEERED FLUIDIC SOLUTIONS SINCE 1979

IVEK Corporation is committed to quality and customer support. Our product has always been relied upon for critical applications and our policy states customer satisfaction as the number one priority. As our customer you will experience exceptional performance and reliability for your most demanding applications. IVEK Corporation is ISO 9001 and ISO 13485 certified.
